VOL. XXXVII, NO. 17.

THE BLAIRMORE ENTERPRISE, FRIDAY, APRIL 26, 1946.

\$2.00 PER ANNUM

"Serve the Church that the Church
May Serve You."

CENTRAL UNITED CHURCH

BLAIRMORE
Rev. James McKelvey, Minister

Services Sunday next:
11:00 a.m., Senior school.
2:00 p.m., Junior school.
7:30 p.m., Public Worship.

ST. LUKE'S CHURCH, BLAIRMORE

Rectory: Rev. W. E. Brown

First Sunday after Easter.
Sunday school 12 noon.
Evening Service 7:30 p.m.

SALVATION ARMY, COLEMAN

Captain and Mrs. T. Smith,
Officers in charge.

Sunday services:
11 a.m., Holiness meeting.
2:30 p.m., Directory class.
8 p.m., Sunday school.
7:30 p.m., Salvation meeting.
Tuesday: 7:30 p.m., Red Shield Auxiliary and Home League.
Thursday: 8 p.m., Praise meeting.
Funerals, dedications and marriages on application to the local officers.

HILLCREST UNITED CHURCH:

Services every Sunday at 8 p.m.

BELLEVUE UNITED CHURCH:

Services at 7:30 p.m. every Sunday.

COWLEY UNITED CHURCH:

Services alternate Sunday mornings at 11 o'clock.

Rev. W. H. IRWIN, Minister.

BELLEVUE BAPTIST CHURCH

Pastor: Rev. Fred Bennett

Sunday school 10 a.m.
Morning worship 11 a.m.
Evening service 7:30 p.m.
Midweek meeting:
Wednesday 7:30 p.m.
A cordial welcome awaits you.

Boy Scouts of Truro, N.S., had the honor to be the first Boy Scouts in Canada to be inspected by Lord Alexander, Canada's new Governor-General and Chief Scout. They were inspected by His Excellency at a break in his journey to Ottawa for his investiture as Governor-General.

TO BE POPULAR as a hostess, serve Maxwell House Coffee. It contains choice Latin-American coffees . . . the finest obtainable. It's blended by experts with traditional knowledge and skill.

DESTITUTE, HOMELESS AND LOOTED MILLIONS

The misery which has piled up in Europe after the war—hunger, disease, and destitution—is sapping millions of men and women of energy, the will to achieve, and even hope itself. A world deprived of the strength and courage of millions is a world that is also shorn of its best chance for the early re-establishment of order and lasting peace. In every possible way help must be given to restore war-sufferers to health and vitality. One of the ways in which every individual Canadian can help is to donate some used clothing for these people, for it will help them to maintain their self-respect, give them courage and hope for the future.

William M. Birks, national chairman of the Canadian Allied Relief, which is sponsoring the National Clothing Campaign from June 17th to June 29th next, stated today that Canadian clothes closets, chests and cupboards yielded sufficient clothing, shoes and bedding last October to help meet the requirements of one million and a half men, women and children. But according to UNRRA and other relief agencies who are working in Europe and Asia, this is only a very small percentage of the destitute, homeless and looted millions of those continents. In the face of inflation, scarcity and ruin, these people have not the means, and no hope of obtaining the means, to buy what little new clothing there is available. Prime Minister MacKenzie King says that the conditions are so appalling that this second appeal to the generosity of the Canadian people is imperative, and has the fullest support of the Dominion government.

At least one serviceable garment is being sought from every man, woman and child in the national collection during the last two weeks of June—anything that any member of the family wears and can spare is urgently needed. Those who are now putting away their sturdy winter clothes can do a humanitarian service by donating some of them to the forthcoming National Clothing Collection.

UNIQUE BOY SCOUT TROOP

One of Canada's most unique Boy Scout Troops is conducted at the Queen Alexandra Solarium at Mill Bay on Vancouver Island. There are nine boys in the troop, mostly birch-bred. Three are Canadian, one Chinese, one Japanese, three Indian and one Swiss. Their scoutmaster is Col. M. E. Dopping-Hepburn, Duncan, B. C., who drives more than 20 miles each week to their regular meeting. He has been connected with Scouting almost since its inception. At 74 years of age he insists on wearing the full uniform, including shorts, at all Scout events.

COWLEY HAPPENINGS

(April 18)

Mr. and Mrs. Roy Easterbrook of Calgary were guests of Mr. and Mrs. Albert Cleland over the week end.

Mrs. Griffith Parry, teacher of the Junior room of the Cowley school, is confined to her home, through illness, this week while her pupils are taking an enforced holiday.

Mr. and Mrs. Cyril Easterbrook, of Delacour, were Cowley visitors for a few days the early part of the week.

Mr. and Mrs. Robert Welsh and small son of Warner arrived here on Wednesday to spend Easter holidays at the parental homes of Mr. and Mrs. Harold Lank, at their home on the North Fork, and Mr. and Mrs. Gordon Welsh of Lundbreck.

Mrs. Doris Sandeman is visiting relatives and friends in Calgary during Easter week.

A well attended meeting sponsored by the local Alberta Farmers Union was held in the Masonic hall on the evening of April 11th, with the objective being a cold storage locker plant for Cowley. P. Peterson, of Pincher Creek. A. Graves, of Calgary, and I. Arnold, of Three Hills, special speakers and men of experience with cold storage were introduced. Mr. Peterson outlined building specifications of such a plant, and he also, in brief, detailed operating same. Mr. Graves spoke to some length on the many foodstuffs, besides beef, pork, fish, fowl, game etc., that could be kept in preservation by the cold storage method. He demonstrated his lecture by motion picture, and related a recent trip to Chicago where he visited a cold storage plant where whole cooked dinners could be kept in such a plant; he also brought pressure to bear on the qualities of foodstuffs preserved by this method, stating that in many instances quality was improved. Mr. Arnold spoke on his experience in operating cold storage plants at Three Hills, Carbon and Swallow. He enumerated the many advantages of the cold storage locker plant method of preserving a great variety of meats, fruits, vegetables, etc. This method of storing foods both here and in the United States is, he said, only in its infancy and that people are only beginning to learn some of the possibilities of what may be done along this line of endeavor.

(April 25)

Mrs. Mae Poolman, who is employed as teacher at Owendale, is spending Easter holidays at her home here. Mrs. Eddie Smyth is a patient in St. Vincent's hospital at Pincher Creek. Mr. and Mrs. Kenneth Martin and their family of four children spent Easter week-end at the home of the former's parents, Mr. and Mrs. Martin, at Mossleigh.

Mr. and Mrs. E. F. Everitt, who have resided here for several years, moved their household effects to Vauxhall on Saturday, where they intend making their home in the future.

Mrs. Robina Hewitt is home from Hasketh, where she is teaching school, to spend the Easter vacation with her parents, Mr. and Mrs. Ed. Hewitt.

Mr. and Mrs. G. A. Neumann and small son Kennedy, and T. P. Neumann, of Pincher Creek, spent Easter Sunday with Mr. and Mrs. M. A. Murphy.

Mr. and Mrs. W. E. Bent, who have resided on a ranch a few miles north of Lundbreck over a period of years, moved into Cowley the early part of the week where they will occupy the residence which they recently purchased from E. F. Everitt.

Mr. and Mrs. Arthur Tustian and their two small daughters, Barbara and Patricia, spent Easter week-end at the home of Mr. and Mrs. J. R. Wood at Cranbrook, B.C.

Mrs. Ida Irwin entertained the local Red Cross branch at her home on last Thursday afternoon at its monthly meeting.

Miss Marjorie Murphy, who is teaching school at Staveland, is spending the Easter vacation here at the home

AVAILABILITY OF EXECUTIVE AND PROFESSIONAL PERSONNEL

Nearly a year ago, the National Employment Service added to the service a new division known as Executive and Professional Offices. These offices were established at Moncton, Montreal, Toronto, Winnipeg and Vancouver for the purpose of placing in employment men and women possessing executive and professional abilities.

A review of the past year's operations of these offices indicates that the demand for executive and professional personnel is heavy, and that a fair number of this type of applicants has become more readily available due to the return of armed forces personnel and release from war industry.

At the end of March, 1946, there were 1,020 openings registered in the executive and professional offices and 1,708 applicants listed as available. The continuing demand for executive and professional persons is due principally to the development and progress being undertaken throughout the reconstruction and reconversion period. A section of the executive and professional offices deals with the problems of ex-service personnel. Although many persons with executive and professional ability seeking employment after being demobilized from the armed forces have limited experience in civil employment, it is gratifying to note that employers are readily accepting these men and women for executive and technical positions.

Since the opening of these offices less than one year ago 6,000 persons have been referred to employment and 4,480 have been placed in permanent employment at annual salaries above \$24,000.

The person subject at the United Church on Sunday evening will be "The Life of a great statesman." At the close of the service a social hour will be held in the assembly hall at which Rev. J. Bainbridge, president of the conference, will be present. You are cordially invited to attend.

of her parents, Mr. and Mrs. E. E. Murphy.

Mrs. Mollie Milvain, of Calgary, and Jimmie Gunn, of Turner Valley, paid a visit over Easter week-end to their parents, Mr. and Mrs. Harry Gunn.

Mrs. Malcolm McMillan left on Wednesday to spend a week in Lethbridge, where she will receive medical treatment.

The Anglican church here was packed to standing on Sunday morning when Rev. Mr. Clark delivered the Easter message of a Risen Savior proclaiming the Glory of that day.

HILLCREST HAPPENINGS

Johnny Fesby is spending his Easter holidays in Lethbridge, the guest of Mr. and Mrs. J. Seaman.

Archie Monti is a Barma visitor, the guest of his grandparents, Mr. and Mrs. T. Caletti.

Miss Gracie Thomas, of Pincher Creek, is a holiday guest here, visiting her brother-in-law and sister, Mr. and Mrs. D. Hulton.

Jackie Craig is a Pincher Creek visitor, the guest of his uncle, Mr. Noble Craig. Jimmy Craig is visiting his aunt, Mrs. Geetz, of Frank.

Dorald Grant, of the staff of the Central Alberta Sanatorium, and Ferguson Grant, who is studying at the University of Alberta, spent the Easter week-end visiting at the home of their parents, Mr. and Mrs. D. A. Grant.

Mrs. Fred White is a patient in the St. Michael's hospital in Lethbridge undergoing a major operation.

Mrs. J. Henderson and daughter, of Lethbridge, are holiday visitors here at the home of Mr. and Mrs. B. Pryde.

Mr. and Mrs. W. W. Webster are visitors at Mountain View this week. Holidaying at Champion last week-end were Mr. and Mrs. E. Ashmore and three children, Fay, Shirley and Dick.

Mr. G. E. Crückshank left on Sunday by train for Winnipeg on business. Misses May Dudley, Alley Green, Christina Grant, Margaret Hollingshead, Sadie McDougall and Mary McDougall are Calgary visitors this week.

KEEP FORESTS GREEN

Spring is the season of hope. For the Forest Rangers who watch over the provincial forests on the east slope of the Rocky Mountains and in the Northern Alberta forest district it is a season of both anxiety and hope. As the fire hazard rises, they scan the horizon with anxious eyes for they know the fearful havoc a forest fire can create. They know the immediate result is the destruction of wild life and sometimes human life. They know of the direct loss of revenue to the province in dues and royalties and the people of Alberta in wages, goods and services. They know about the lowering of the water-tables and spring floods and soil erosion. It is not to be wondered that they are anxious.

They hope for the hearty co-operation of all citizens and particularly of settlers near the edge of the forests who are clearing their land and must burn the debris. They hope that throughout the year trappers, campers, lumbermen and all other users of the forest will be careful with fire. We appeal for the assistance of every Albertan to help keep the forest green.

MAY SOON OPEN ALASKA ROAD TO CIVILIAN TRAFFIC

There are good prospects of the Alaska highway being opened to tourist traffic this summer, according to information received by the Alberta Motor Association.

An application has been received by the federal government authorities now in charge of the road from the British-Yukon Navigation Company, which says that if it is given a bus franchise, it will establish tourist facilities at different points along the highway.

Such a step would be of first importance because Canadian officials have stated that any opening of the road to civilian traffic will depend on the facilities to take care of tourist trade.

The BC-Yukon Company has been operating buses over the route for some months, under contract with the U.S. authorities. This arrangement would lapse when the Canadian army took control of the road on April 1.

REO MOTOR COMPANY OF CANADA LTD.

First postwar production of trucks and transit coaches in Canada will get under way this month, at a new manufacturing plant near Toronto, announced today by H. E. Hund, president of Reo Motors, Inc.

Announcement of Reo's purchase of the new manufacturing and assembly plant, which means substantial addition to Canada's industrial payroll and increased need for Canada's fabricated parts, also stated that conversion of the plant to the manufacture of trucks, coaches and buses is nearly complete and that production is beginning to roll.

For this purpose, Reo is converting one entire unit of the Canadian government's wartime radar plant, located in the industrial center of Leaside, Ont., a mile and a half from Toronto.

This provides suitable facilities, according to Mr. Hund, for combined truck and bus production with a total capacity ample to meet Canada's growing industrial and transportation needs. Expected output, qualified observers say, exceeds many times Reo's prewar Canada total and suggests greatly increased exports throughout the British Empire.

The new plant is a modern, one-story daylight factory, with approximately 59,000 sq. feet of floor space, easily accessible for workers and equipped with railroad sidings for incoming raw materials and outgoing finished vehicles. It will operate under the direction of Robert J. Telford, vice-president and general manager, Reo Motor Company of Canada, Ltd.

The company also will continue to operate its present factory branch at 36 Yorkville Ave., in the business center of Toronto, according to Telford. Until now, this has been one of the only two complete bus manufacturing units in Canada.

"Acquisition of the new factory at Leaside," Telford said, "indicates Reo's faith in the industrial future of Canada, both as an expanding market for commercial vehicles and as a source of such equipment for the British Empire."

"All manufacturing work previously performed at the Toronto branch now will be centralized at the Leaside factory. The branch also will continue in full swing, however, as an improved parts depot and service operation capable of handling any kind of special work on trucks or buses, including major modifications of chassis and bodies of any type."

"The Toronto branch will continue to be the nerve center and hub of parts and service distribution to the entire Canadian network of more than 100 Reo distributors and dealers, throughout the provinces."

Eggs with a smile for Britain

These are part of the 100 million eggs required to fill Canada's contract with Britain in 1946. There's a ready market, says the Dominion Department of Agriculture, for all top quality eggs that can be produced in Canada this year.

WORLD HAPPENINGS BRIEFLY TOLD

Former members of R.A.F. crew may apply for their flying log books for personal retention.

The 18th century windows of King's College chapel at Cambridge, Eng., removed during the Blitz, are being replaced.

The King recently sent a 14-foot oak tree sapling to be planted in the Garden of Remembrance in Kentish Town parish church.

The results of a census taken in Poland last Feb. 15 show a population of 13 persons per square mile, Warsaw radio announced.

The original manuscript of "Alice in Wonderland" sold in New York for \$30,000 to A. S. W. Rosenbach, collector of rare books.

Twenty-eight girls and 12 men from British universities have gone to France as guests of families in university towns under a students' exchange scheme.

Mayor A. W. Curton has sent 15,500 "be courteous" letters to children of London, England, whom he says have been "aping the tough-guy training of soldiers."

The King's Prize for the best plowman was won recently at Langley, Buckinghamshire, by P. Wakefield, aged 61, a plowman at Crippenham Court Farm, Slough, for 31 years.

Employees of a British railway cultivated 21,150 potatoes which extend 400 miles by the side of the railway tracks. These yielded a record harvest last year, valued at \$99,000.

Tom Johnston, chairman of the Scottish Labour board, said recently that Scotland should make all the souvenirs required for visitors. "We don't want any to be bought from Japan or Birmingham."

"Whitewater Jack"

Man Who Is Interested In The Progress Of The West

That is certainly a very appropriate name with which John R. MacNicol, Toronto M.P., has been dubbed. "Whitewater Jack" is a public servant of Canada, who does not confine his interest to his narrow little urban constituency, Toronto-Davenport, but is interested intensely in the whole of Canada.

On foot, by horseback and by steamboat and canoe, he has personally surveyed the northern reaches of the Dominion and he wants a great irrigation plan adopted for Saskatchewan and Alberta. We spent \$400,000,000 or more per month on war; we can spend a like amount to make the great area of these western provinces the richest productive on God's green earth.

To quote from the Ottawa news despatch:

Mr. MacNicol, who talks of water conservation with or without listeners, but preferably with, sums up his creed, for that is what it has become:

"Where has the water gone to?" referring, of course, to the mighty Saskatchewan. "It has gone down to the sea without having done any good to the parched prairies."

"Those parched prairies, if they are given sufficient water, will grow anything. There is no better land in the world. In some places it is a little alkaline. But the vast proportion of it contains the necessary chemicals to produce crops of all kinds in abundance, provided it gets water. It is a part of my purpose to see that it does get that water."

It is of interest to note that in his resolution before the House, Mr. MacNicol was strongly supported by the leader of the C.C.F., Mr. J. Coldwell. What the plan means simply is the harnessing of great river streams to make more fertile the lands of two great provinces. They have done the same thing in certain States of the Union to the South; Mr. MacNicol is urging the same thing for his own country.

In his off time from duty in Parliament this man has travelled to the great North and West; he has investigated, and has brought a keen scientific mind into play, also imagination and foreseeing the future which might well be for his country's welfare. Mr. MacNicol cannot be young as years go, but he leads the strenuous life and there is no doubt that he can tell the Prime Minister much more about the constituency of Prince Albert, which Mr. King represented in the House for many years, than the P.M. ever knew himself. Mr. MacNicol is a great Canadian—St. Catharines Standard.

NOT QUITE BANKRUPT

The Lincoln, Neb. State Journal tells this story: The dinner started with cream of tomato soup. The main course was a giant rib roast, with mashed potatoes and broccoli. Soft rolls of white flour were served, with two patties of butter to a plate. Dessert was apple pie with ice cream. There was coffee with cream and sugar. The speaker cleared his throat. "We are a bankrupt nation," he began.

Ducos of France patented a device for showing motion pictures as early as 1864.

TRADE RESTRICTIONS

Tariffs Impose A Burden On The People Of Western Canada

The governments of Alberta, Saskatchewan and Manitoba have united in a plea to the federally-appointed Trade and Tariff Commission for removal as rapidly as possible of unnecessary restrictions on world trade. If necessary, a 3,000-word brief addressed to the commission, the briefs by Premier E. C. Manning, T. C. Douglas and Stuart Carson said, Canada should take unilateral action toward that end.

The brief, prepared by the economic representatives of Social Credit, C.C.F. and Coalition administrations, reviewed the "fundamental importance" of exports to Canadian economy, the dependence of prairie agriculture on exports to the United Kingdom and the United States and the effects of trade restrictions on production and living costs.

It turned then to expression of the "strong conviction of the citizens of our provinces" that immediate action should be taken toward removal of existing restrictions.

Changes brought about by the war, it said, had in no way lessened the traditional argument against trade restrictions as a source of increased costs to Canadian consumers and exporting industries. Instead, there appeared to be considerably less grounds for the traditional fear of Canadian industry that any reduction of its tariff-subsidy and other trade restrictions would threaten profits if not existence.

It voiced approval of steps already taken to reduce tariffs on farm machinery and other items which entered into production costs of Canada's exporting industries and asked further steps in that direction. It recognized as the first objective in removing tariff schedules. Equal importance should be attached to removal of restrictions on commodities which entered directly into the living costs of Canadians.

Traditional arguments of protectionists in Canada, the brief said, had been that tariffs were required to protect the "infant industries" against competition of the more mature, large-scale industries of other countries, particularly the United States. The result had been "much unjustified tariff legislation which has imposed a tremendous burden on the people of the prairie provinces."

Whatever validity the infant industry argument might have had, Canadian industry had grown up without tariffs, and its products now should be expected to face world competition. The infant industry was in a more favorable position than ever before. Not only had it matured and developed, mass production methods had been developed, the relative costs of production in Canada and the U.S. had moved in Canada's favor. While costs of production had increased here, war expenses had endeavored a smaller increase than in the U.S.

The result was many Canadian industries were in a much stronger position to meet American competition than ever before.

Experiment Reversed

Scientists Find More Accurate Standard For Measuring Length

A little ray of green light, given off by mercury atoms, made from gold, may give the world a new and more accurate standard for the measurement of length.

The remarkable thing about this light ray, its originators say, is that its waves do not carry in length by more than 0.0000015 of an inch. Development of the light source by Dr. Jacob Wiens, of the United States Navy electronics research laboratory at Berkeley, Calif., and Dr. Luis W. Alvarez, one of the atomic bomb scientists, was announced by the University of California.

Wiens and Alvarez used the cyclotron to transmute the gold into mercury, thus reversing the favorite project of the medieval alchemists, who tried hard but failed to turn mercury into gold.

Takes Cadet Salute

Princess Elizabeth Officiates At Ceremony in London's Hyde Park

Princess Elizabeth, wearing a navy blue coat and hat, took the salute from between 5,000 and 6,000 army cadets at a march past in London's Hyde Park.

With the princess at the saluting base, where her personal standard was flying, was Maj.-Gen. R. E. Urquhart, who commanded the 1st Airborne Division at Arnhem and whose now is director of the Territorial Army and the Army Cadet force.

Contingents in the parade represented every county cadet association in the United Kingdom.

At the end of the parade the various county representatives were presented to the princess.

ONE BIG ITEM

The biggest item of cost in the production of eggs is feed. Normally, feed makes up from 50 to 60 per cent of the total cost with labor figuring about 20 per cent of the total.

The Empire State building in New York has seven miles of elevator shafts.

NURSING CONSULTANT ONCE POOR FARM WIFE—Mrs. C. A. R. Abernethy, who was appointed consultant and adviser in nursing services to the UNRRA in Greece, and recently left for that trouble spot in the international situation, was taking out a precarious living working with her late husband for a few dollars a month on Saskatchewan and Manitoba farms during the depression years of the '30's. She replaced Mrs. True in Greece, killed in a plane crash while on holiday in Italy. Since 1939, Mrs. Abernethy had been a member of the public health service of Newfoundland, where her constructive work during a period of depression, followed by an economic rise and military occupation boom, won wide recognition. Later she took charge of a hospital in northern Newfoundland, near Labrador, formerly in charge of two doctors, and for three years, with a staff of five, she was responsible for the medical administration of a large territory. Her success in Newfoundland made possible her present post with UNRRA.

MRS. ABERNETHY

Mrs. Abernethy travelled like this in Newfoundland.

Sun Spots

How They Have Been Found To Effect Radio Transmission

Science found a new explanation for the fact that sun spots play on radio communications.

Three scientists at the Carnegie Institution of Washington announced the discovery of electrically-charged gases which speed from the sun into the earth's atmosphere and seriously disturb the travel of radio waves.

The gases originate in or near sun spots and race toward the ionosphere, the upper layer of the earth's atmosphere, at about a mile a second clip. They then undergo marked changes which result in the fading or disappearance of radio signals.

The scientists were H. W. Wells, J. W. Watts and D. E. George. Using new techniques for observing phenomena in the atmosphere, they made their investigation at the ionosphere laboratory at Kensington, Md., during the magnetic storms which disturbed radio communications March 25 and 26.

They said the disruption begins when the clouds rush into the P-layer of the earth's atmosphere. The P-layer is a layer of electrically charged air which normally is steady enough to bounce radio waves downward toward the earth and thus make long distance broadcasting possible.

But the on-rushing clouds cause rapid changes in the height of the layer, thus changing the distances over which broadcast waves must be reflected for transmission from station to station.

The scientists said the clouds are not to be confused with cosmic rays. They are the result of bombardment of the earth's atmosphere by bursts of electrically charged corpuscles, which are like streams of "dust" from the sun.

The discovery indicates that the ultra violet light coming from the sun is not the only means of producing the ionized layers of air whose density and whose height above the earth are fundamental considerations in man's radio undertakings," the scientists said.

REG'LAR FELLERS—A Pleasure Ride

Northerner Aroused

Thinks People Make Altogether Too Much Fuss About Cold

All this publicity about the Canadian Army's "Operation Muskox" is both humorous and preposterous to J. Otten Ogilstone, of Moose River, Ontario. Mr. Ogilstone, who is a section foreman on the T. & N.O., regards the whole business as an implied rebuke to the ferocity of the north.

"I can show you right here people living in common tents and I never hear of any one freezing," he says in a letter to the Ottawa Journal. "I was born and raised near North Bay, lived and worked in the North. It is not so terrible living in this north country. It is very healthy."

Even though we do live 44 miles south of Mooseone, at James Bay, we have a good garden at the T. & N.O. railway station house each year."

Although the majority of Canadians might never think of it that way, Mr. Ogilstone has made his point. After all, they have been coming the Arctic Circle now by dog team and plane for many moons, and little has been thought of it, except to build up as a tourist bait, and establish the dubious girility of Jack Canuck.

So why, as Mr. Ogilstone suggests, should there be such a to-do about people who are sleeping in "tents lined with nylon and heavy mats on the floor, with robes on top of that, then sleeping bags and oil burner stoves or heaters?"

"Operation Muskox" can only reduce the hurt it has done to the North by bringing back those wonderful tales of yellow flowers and red berries in the barrens; and Shangri-La valleys and the muskox itself feeding in them under the Arctic twilight, that have so long been offered to the south. The army should know how to do it.—Hamilton Spectator.

DIFFERENT NOW

A letter posted in Dublin in June, 1941, by her sister was recently delivered to Mrs. Fred Driver of Wimbledon, London. It spoke of a grocer "who would not cut a few pounds off a ham but made me take the whole thing."

Food Production

International Distribution Of Fish To Help The Food Shortage

An intelligent international distribution of fish to help relieve the present serious lack of food throughout the world, was advocated at Ottawa by C. J. Morrow of Lunenburg, N.S., retiring president of the Fisheries Council of Canada.

Speaking before the Council's first annual meeting, which was attended by representatives of the Dominion's major fishing industries, cabinet ministers and heads of Government departments, Mr. Morrow said that "it doesn't make sense for European countries to be shipping fish to the United States, Cuba and even Australia when people are going hungry at their very doors." He added that there is evidence controls under the War Cabinet of the world must be speedily resumed and invoked through the co-operation of commercial and industrial agencies "if famine and chaos are to be prevented."

Mr. Morrow, who was succeeded as president of the Council by J. S. Eckman, of Vancouver, urged the Council to encourage the government to think of fish as food and to include fish in any long-range planning for increased food production. Such action, however, must be accompanied by a long-term plan of marketing.

"Even now," he said, "with millions in the world starving, it is quite possible that we shall have a surplus of some varieties of fish on the markets of this continent this year. For that reason—a serious effort should be made by our government to bring about agreements with the nations concerned for an intelligent international distribution of fish."

Mr. Morrow told the delegates that the Council is now urging the government to exempt from customs duties equipment required from other countries and necessary to the fishing industry. He said this particularly applied to instruments that would assist in improving and extending facilities for production, processing and distribution. The Council is also taking measures, he added, to help maintain the standard of living of all engaged in the industry throughout Canada.

For Eye Health

Eat Yellow And Orange Foods Which Contain Vitamin A

Did you ever envy a cat its ability to see in the dark? Ask the Nutrition Division. The matter comes in connection with the present shortage of butter, the best source of vitamin A which takes care of eye health and prevents night blindness. However, a good nutrition rule to follow is that naturally yellow and orange foods generally contain a lot of this important vitamin. Some of them are carrots, squash, pumpkin, red peppers, tomatoes and yellow corn. Use them cooked or raw, use them often and make the servings large.

Armenia became the first nation in history to adopt Christianity as a state religion in 303 A.D.

Many Returned Servicemen Could Qualify As Male Nurses

There is a shortage of nurses almost everywhere now and there might possibly be a suggestion considered carefully for the use of male nurses. Some returned servicemen must have served as orderlies overseas and have some qualifications to start nursing service. There are also first aid experts among the war veterans, possibly they could start a project for male nurses. Many men would prefer male nurses and there are other cases where they would be desirable. At present there are six hundred registered male nurses in Great Britain and they have a society which hopes to raise the number to 60,000. The British promoters of the plan say male nurses are much needed and never need to be out of jobs over there. Men who have learned preliminaries in the war services are offered a three-year training course to qualify them for civilian tasks. It is proposed that eventually hospitals in Britain will have half the staff male nurses and half female.—Brandon Sun.

Makes Good Story

Midget Was Found Living In New York Phone Booth

"That old housing-shortage gag—" Why don't you move into a telephone booth? came true in New York. A 45-inch midget was discovered enjoying light housekeeping in a booth in a lobby of a Broadway motion-picture theatre.

The midget said her name was Miss Helen Magna. Since she found there wasn't even room enough for a midget in New York, Miss Magna said, she moved into the booth with an alarm clock, a tiny stove, a lot of bread, bottle of milk and a can of salmon.

It might have been a press agent's gag, but anyway she was forced to move again.

OUR COMPLETE SHORT STORY—

TODD'S TRAGIC TIE

By EULALIE WEERS

Copyright
Wheeler Newspaper Syndicate

JUST as I was glancing at the glaring headline, "MR. TODD WILL DONATE \$50,000", in our small town evening newspaper, the phone rang.

Jennie was practically shrieking. "Did you hear about old Todd?"

"Not THAT! He was murdered!"

"MURDERED?"

"Yes-s-s. Both Kay and Tom have been arrested!"

"But it's not an hour since Kay left here!"

"I KNOW. She went right home and she and Tom killed the old man!"

"I don't believe it."

"I don't know..." Rely on Jennie to think the worst! "You know how queer Kay behaved this afternoon."

"Jenny Harding, that's utter nonsense! Kay was nervous but she could have had a dozen reasons besides plans to kill her father-in-law. I won't believe either she or Tom had a thing to do with it. What happened?"

"Mattie said both Mr. Tom and Kay came in shortly after Mr. Todd. At 8, Mattie went to tell the old boy that dinner was ready and found him strangled..." No one else was in the house. Kay and Tom acted shocked when the police arrested them..." Old Todd had about \$500 cash, that's missing, too."

"Who killed the police?"

Jennie certainly capitalized on being the wife of the city clerk—what a news monger!

"Mattie! She told the police that Mr. Tom and the young Mrs. Todd say a word to each other. I tell you..."

"...small something burning. I'll talk to you later." I didn't want to hear any of Jennie's personal opinions. I dashed to the police station. The unprejudiced police had had a terrific effect on our local constabulary—the Chief was bustling with authority.

"We were just going to interview you, Mrs. Taylor. Mrs. Todd played bridge at your house this afternoon? Did she act different in any way?"

"I don't think so."

"Another witness says she seemed very nervous."

"That might be the other witness' opinion."

"Or you might be prejudiced in favor of the prisoner?"

"Perhaps I know her better than anyone else. She's my best friend and she wouldn't commit murder for \$50,000 or \$400!"

"For another reason though?"

"I didn't answer. I was thinking Kay would have been justified for bumping off old Todd any day during the past seven years. His treating me and daughter-in-law like doormats. People wondered why they stayed with him but I know the details concerning their lives, realized it was virtually impossible for them to leave. Today Todd had announced that he intended to give away half his fortune to establish a "Hospital for Cats" for years his hatred of animals had been general knowledge! Insane? Doctors said no."

"What time did Mrs. Todd leave your house?"

"About 5."

"Um-m-m, she and Mr. Todd got home about the same time... 5:30. Mr. Todd was murdered between then and 6..."

"How do you know it was murdered? He may have committed suicide."

"Strangled himself with his own necktie from behind? Either Mr. or Mrs. Todd, and perhaps both, are guilty of murder."

Did I see red!

"What about an outsider?"

"All doors and windows were locked—inside."

"The maid had no motive."

Kay didn't rush into my arms or burst into tears. She just sat.

"I know you didn't kill old—Mister Todd, Kay. I want you to help me prove it."

"No answer. I talked a lot."

"Are you afraid Tom did this?"

Now Kay looked at me and the terror in her eyes was answer enough. I didn't waste time. Williams was the only cop in Tom's cell. Williams believed in the law, right to the letter. He didn't like the way I drove our car. Tom was all keyed up.

"You've seen Kay?"

"Yes. Don't worry about Kay, Tom. My advice was instantaneous."

"Tom, did you get home before or after Kay?"

Silence.

"Tom, I'm trying to help. You must co-operate."

"I thought I heard Kay come in after me."

"But..."

"Skip it, Katie."

"But?"

"I met Jake in the gateway—he said I'd better hurry—the Mrs. was looking for me."

"Jake? The furnace-man?"

"Yeah."

I hiked back to Kay's cell.

"Kay, when did you last see Jake?"

"Jake? Are you crazy? I haven't seen Jake for days."

Outside Tom's cell I called Williams aside.

"Is he inquest in the morning?"

"Yes'm."

It took all my ingenuity and mighty fast sales talk plus much repetition of the word "promotion" but finally Williams agreed to meet me when he got off duty. For over an hour my eyes were glued to Jake's disreputable-looking front door—more the pity! There was no response to Williams' knock. The back door yielded to one good push but inside Jake's amply kitchen we realized the house was empty. Williams drove my car to the depot. There wasn't a soul in the waiting room but by the dim light from the freight shed we discerned a figure, in the shadow of the building, which was familiar to me. I hissed.

"Give him the works!"

"But if your hunch is wrong?"

"I'll sign a confession myself!"

Williams grabbed Jake's arm and, in an authoritative voice, boomed.

"Jake Smith, I arrest you for the murder of one Mr. Thomas Todd and for the theft of approximately \$400."

Old Jake looked almost relieved. Williams definitely looked relieved as we listened to Jake's abusive flow of language.

"That old blankety-blank so-and-so deserved what he got..."

I drove to the police station and, for the first time in his life, Williams relented regarding the letter of the law.

"Step on it, Mrs. Taylor—the sky's the limit!"

"MISS MIAMI BEACH"—Jim Boyd, former resident of Toronto, Ont., and daughter of James E. Boyd, famous Canadian pilot, has been chosen as Miss Miami Beach of 1946. She will go to Atlantic City in September to compete for the Miss America title.

Now Necessaries

Many Things Demanded Today Were Once Considered Luxuries

"People who come across old grocery bills or old coal bills or old tax bills are amazed at the advances in price which have taken place. They can hardly believe their eyes. Yet the cost of living is not as high as it was immediately following the First World War. People at that time were paying double pre-war prices."

Increase in wages in industry, however, following the Second Great War, is keeping pace with the increase in the price of necessities. As a result many things are considered necessities today which were formerly regarded as luxuries.

It is interesting to note that in 1911 the minimum wage of civil laborers was 25 cents an hour. Today cities themselves pay 60 cents an hour.

Roosevelt Memorial

London Times Thinks Grosvenor Square Would Be Best Place

The London Times proposes that Grosvenor Square—where the United States embassy stands—be adopted as the site for memorial statue of Franklin D. Roosevelt. "The monument should be placed in the centre of Grosvenor Square and the surrounding garden should keep green forever the recollection of the fraternal bonds which were forged thereabouts," a Times editorial said.

To Feel Right—Eat Right!

OCEAN FURNITURE POLISH

... "And Then There Were None"

Then one day an Experienced Friend suggested maybe it was the caffeine in the Tea and Coffee he drank that kept the sheep jumping over the fence...

So Harold STOPPED tea and coffee, and changed to POSTUM...

And in a few nights only a dozen...

Many people can safely drink tea and coffee, but others are upset by the caffeine these beverages contain. If you find yourself sleepless, nervous, irritable—try changing to Postum. You'll like its rich, heart-warming flavor. Not like tea, not like coffee, just a grand flavor all its own.

Easy to fix—make Postum right in the cup just by adding boiling water or hot milk. Costs less than 1¢ a serving.

Very Effective

Man Stopped Blowing Off Auto Horn By Simple Means

The horn in an automobile parked a half block from the police station in Chicago, blew and blew and policemen's tempers flew as they exhausted every effort to halt the piercing blasts. For nearly two hours Sgt. John Moroney was harassed by telephone calls from irate residents unable to sleep. As police gave up, Cleveland Andrews, who lives near the station, walked over to the car and kicked a front wheel. The horn stopped.

Compliment Catcher

4562 SIZES 12-20, 40

A schoolmistress asked a child what "S-e-o" spell.

The child hesitated.

"What do I do when I look at you?" said the mistress.

"Thugkin," replied the scholar.

She was describing her favorite brother.

She: Grass never grows under his feet.

He: "A go-getter, huh?"

She: "No; a sallyer."

Discover Home Skin Remedy

This clean stainless antiseptic known all over Canada as Moore's Shining Oil is such a fine healing agent that Eczema, Itchy Rash, Salt Rheum, Itching Feet, and other inflammatory skin eruptions are often relieved in a few days. Moore's Shining Oil is pleasant to use and it is so antiseptic and restorative that many old stubborn cases of long standing have yielded to its influence. Moore's Shining Oil is sold by drug-gists everywhere to help rid you of skin blemishes and unsightly skin troubles—satisfaction or money back.

RECIPES

QUICK CASSEROLE TOPPING

1 cup Grape-Nuts Flakes
1 teaspoon melted butter or other shortening
1/4 cup grated Canadian cheese
Use cereal flakes whole or crush slightly. Heat in saucepan, shaking pan back and forth over heat. Pour butter over hot flakes and toss lightly to distribute butter evenly. Put into bowl; add grated cheese and mix lightly. Sprinkle as topping over any creamed dish or casserole. Makes topping for small casserole.

A little minced onion may be cooked in the melted butter. Cheese may be omitted. Bits of cooked bacon or ham may be added.

CHEESE POTATO PUFFS

2 cups well-seasoned mashed potatoes
1/2 cup grated Canadian cheese
1 teaspoon minced onion
1 cup Grape-Nuts Flakes, slightly crushed.

Combine potatoes, cheese, and onion, and mix thoroughly. Shape into balls; roll in slightly crushed cereal flakes. Bake on greased baking sheet in hot oven (400 deg. F.) 20 minutes. Makes six servings.

PRAIRIES SUITED TO

FLAX GROWING

Canada's Prairie Provinces are ideally suited to the growing of flax, according to a survey made by the National Flax and Linseed Flax Committee which has been studying ways and means of averting a threatened shortage of linseed oil in the Dominion. Linseed oil, used for many essential purposes in Canada, is made from flax.

The survey results are of special interest right now, in view of a recent increase in flax prices from \$2.75 to \$3.25 a bushel as of August 1, 1946.

The cool climate of the prairies lend itself so well to the growing of this crop that 95 per cent of all flax produced in Canada at the present time comes from the three provinces of Manitoba, Saskatchewan and Alberta.

The committee points out, in its study of the situation, that the best results from flax are obtained when it is used in proper rotation with other crops and adds that little trouble may be expected from weeds if clean seed is used in clean soil. Under proper conditions a yield of 15-20 bushels per acre is not unusual and with such a yield the crop will prove profitable to farmers.

Although early experiences with flax were not always satisfactory to the farmers, the trend has been reversed in many cases in recent years. A survey of farmers who experimented with this crop finds many high in their praise of flax as a profitable and satisfactory farming operation.

"Flax crops will stand more drought, hail, windstorms, damage, heat and unfavorable conditions than any other crop we have grown," H. B. Sommer-ville, of Hartney, Manitoba, stated recently. "We get fair crops of flax when other grain fails," he said and added that in his experience the crop could be sown as late as the 21st of June, although May sowing eliminates danger of early frosts. "Last year," he said, "our wheat crop averaged \$24 per acre on our best ground while our flax, on our second best ground, averaged over \$35 per acre."

F. Van Ryssel of Oakbank, Manitoba, indicated that he had been growing flax for 15 years and that on the average he found flax more profitable than wheat. He added that this was accounted for, in part at least, by the fact that there was a substantial revenue for the straw, which is used in paper making. Each acre yields about half a ton of straw.

"The most profitable crop I have produced in 35 years of farming experience was a crop of Royal Flax, a record of more than 30 bushels to the acre on several hundred acres," A. Summach of Anquith, Saskatchewan, says of his experience with flax.

The committee which is studying this problem is prepared to provide farmers of Western Canada with detailed information regarding planting and harvesting of this crop. A booklet released by them entitled "The truth about flax" contains many interesting answers to questions frequently asked by farmers about flax.

TEAMWORK OR TYRANNY?

I'm a returned GI and there's one kind of talk that really burns me up. With the morale of the soldiers overseas all shot and industries tied up at home, a fellow had the nerve to say to me the other day: "Oh well, we had more strikes and more unemployed after the last war—it will straighten itself out." This attitude is so typical of many people today who look at things through sleepy lids and rose-colored glasses and expect things to blow over sooner or later.

Did my buddies get blown to bits on the beaches of Normandy and Anzio just so that we can have a few less unemployed or fewer strikes than after the last war? Did we force the Nazis and Japs to holler peace so that we could return to our private wars at home?

The extreme Right tell us that Labor is to blame for everything. The Leftist groups tell us that it is the fault of the employers and the big bosses.

The old game of blaming the other fellow is about played out. Something new has got to come into the situation. It's wake up or break up for America, and I'm not kidding!

I have talked with hundreds of AFL, CIO, and railroad leaders as well as leaders of management, in all the major industries across the country. Many of them found that Frank Buchman's idea of revolutionary teamwork is more effective than any ideas of Marx or reactionary management.

I saw revolutionary teamwork in action a few days ago in one of our great industrial cities. The superintendent of a plant and many of the union men came to see the industrial drama, "The Forgotten Factor," and

IT REALLY IS SMART to serve Maxwell House. This famous blend of coffees has extra fragrance and flavor — extra smooth, full body. It's always "Good to the Last Drop!"

caught the idea. He was amazed at the change in one of these union men.

The superintendent decided he needed to change, too. He apologized to the union man and said, "I have blocked you every way I could because I did not trust you. That is past now. I am sorry. Let's work together."

Difficult negotiations took an entirely different turn. That plant has found what I mean by "revolutionary teamwork." It has applied the ideology of Moral Re-Armament.

Get a few guys in labor or management to live out this quality of teamwork and the other side will change

too. We must put the country before cash. Labor and management still have time, but not very much. Will they give the lead that America needs? Revolutionary teamwork or tyranny by revolution—that is the choice confronting us today. — S/Sgt. Duncan Corcoran.

You may find yourself in the same position as Joe Green. Anybody may! Personal loans through your bank make it possible for you to anticipate future earnings. This is an essential part of its services.

Such loans may be obtained to meet financial needs of many kinds; to lay in ahead a winter's supply of coal, to pay municipal or other taxes in time to earn the discount, to provide for home repairs, to send a boy or girl to college, to consolidate debts—indeed for any sound reason.

Bank credit runs through all personal life and commercial life. It operates silently and unobtrusively. You take it for granted. That is the way Canadian banking works.

THE BREWING INDUSTRY OF ALBERTA

In Alberta we have a great heritage in our forests and streams. If our forests are blackened and ruined by fire instead of forest industries supplying the building material we require and providing a living directly and indirectly for thousands of people, instead of our shady playgrounds, big game, fur-bearing animals and our pleasant streams, what are we going to have? A ruined industry, roaring torrents in the spring and dry water courses in the

summer, soil erosion and all the other ills that occur in any country where the balance of nature is upset by the destruction of a great part of the forest.

Your local ranger contends that a lot of good citizens live in his district. He takes this opportunity to thank you for the co-operation you gave him last year and he is sure the more you realize the situation, the more he can count on your co-operation and assistance.

What every housewife
should know...

about SUGAR FOR CANNING

There is a world-wide shortage of sugar. Last year world sugar production was twenty-five percent below 1939. Reasons for the decrease are:

- Destruction of the sugar industries in Java and the Philippines.
- Shortages of labour and fertilizers in many sugar-producing countries.
- Last year's drought in the Caribbean area, especially Cuba.
- Damage to European sugar beet fields.

World sugar supplies are pooled for the benefit of the United Nations, Canada, the United States and Great Britain are allotted an equal share of sugar according to population. Available supplies must also be shared with other countries.

TEN POUNDS OF CANNING SUGAR PER PERSON

This year's canning sugar allowance is ten pounds per person—the same as last year. Instead of special canning sugar coupons, ten additional green "S" coupons are being made available for the purchase of canning sugar.

S8 to S12 inclusive become valid on May 2nd; S17 to S21 inclusive on July 4th. Each coupon is good for the purchase of one pound of sugar.

The ten "S" coupons for canning sugar are in addition to

the "S" coupons which regularly become valid each month for the purchase of sugar and preserves.

Those who do not wish to do home canning may use the extra coupons to buy commercially packed, jams, jellies, canned fruit, etc., or sugar to supplement the regular ration.

The ten "S" coupons for canning sugar need not be used immediately they become valid. You will be given ample notice of their expiry date.

THESE ARE YOUR "S" COUPONS FOR EXTRA SUGAR

VALID MAY 2

Any valid "S" Coupon, including those shown here, may be used to purchase sugar for canning, or the amount stated below of preserves.

The green "S" coupons S8 to S12 and S17 to S21 are in addition to the "S" coupons which regularly become valid each month for the purchase of sugar and preserves. They are validated to make available enough sugar for home canning or for other household uses.

"S" COUPON CALENDAR

8th April . . . S5	20th June . . . S15 and S16
18th April . . . S6 and S7	4th July . . . S17 to S21
2nd May . . . S8 to S12	18th July . . . S22 and S23
16th May . . . S13 and S14	15th August . . . S24 and S25

VALID JULY 4

ALTERNATIVE VALUE OF ALL "S" COUPONS

1 lb. of sugar	OR	24 fl. oz. cane, jelly, marmalade	OR	80 fl. oz. maple syrup valid May 31, after May 31, 4 lbs.	OR	7 qts. molasses
4 lbs. honey	OR	8 lbs. heavy butter	OR	48 fl. oz. canned fruit	OR	36 fl. oz. blended table, cane or corn syrup

AMOUNT OF SUGAR USED IN CANNING

Each housewife may use her canning sugar to fit the needs of her particular household. A common method is to allow $\frac{1}{2}$ lb. sugar for each quart of canned fruit; and $1\frac{1}{2}$ lbs. sugar for each quart of jam or jelly.

SUGARLESS METHOD OF CANNING FRUIT

Many home economists recommend the sugarless method of canning fruit. Sugar can be added during the winter as the fruit is used. If you have not a copy already, write the Department of Agriculture, Ottawa, for "War-time Canning" pamphlet.

CLIP THIS CALENDAR FOR READY REFERENCE

CLIP THIS CALENDAR FOR READY REFERENCE

Lehman Attacks Food Plans Of United States

WASHINGTON.—Naming Canada and Australia as two of the main food-producing countries which have retained wartime controls to help feed the starving abroad Herbert H. Lehman, former director-general of the United Nations Relief and Rehabilitation Administration, accused the United States of "faulty planning and unrealistic measures" to avert world starvation.

Speaking before a world food emergency mass meeting in Constitution Hall, Mr. Lehman delivered a blistering attack on the administration's attitude toward the starving.

He resigned as UNRRA head following the appointment of former president Herbert Hoover to lead a fact-finding mission through Europe's starvation areas.

"UNRRA has enough facts," he declared. "But people cannot eat facts. How many facts do we have to give the supplying countries before they will give us sufficient food?"

He differed with Mr. Hoover and other administration officials who have declared rationing is not needed to enable the United States to share its plenty with the starving. He also differed with President Truman's statement that the crisis would be over in 90 days if the present emergency is met.

Mr. Lehman commented that the main grain-supplying countries were United States, Canada, Australia and Argentina.

"Only the United States was favored last year with bumper crops. The other three must show a decline in production due to droughts and other factors," he said.

But they are making indispensable contributions to meeting the world food crisis. Australia and Canada have retained their wartime controls and the major proportion of their crops is being exported abroad.

"I repeat that these two great countries are still maintaining the wartime food controls.

"I want to be very frank. The United States government has not done everything it could to avert world disaster. This country—which alone has the resources to save the day—made a most unfortunate decision in abandoning rationing late in 1945."

He demanded immediate orders setting aside a certain percentage of American grain for export even at the expense of some domestic civilian distribution because "once this wheat goes into the store shelves in the form of bread, it does not make much difference whether we decide to buy an extra loaf or not."

WRECK LOCATED

Sea Diver Re-discovers, Galleon Supposed To Contain Treasure

MIAMI, Fla.—Re-discovery of the long lost Spanish trader galleon Santa Rosa, reputedly with \$30,000,000 in stolen Aztec gold aboard, was announced today by Irwin A. Williamson, sea diver.

Williamson said he found the coral-encased hulk of the Santa Rosa in 146 feet of water off Key West.

"We removed the three identification marks which we put on the wreck in 1940-41, before the war halted our further attempts to locate the treasure," Williamson said.

"We could not go deep into the hulk to find if the treasure is still there, because the wood planks of the ship, buried in the sea since 1620, crumbled like potato."

Williamson was the first man into a coral cave engulfing the wreck and was followed by Carl Parsons, diver, and R. J. Lilley, both of Birmingham.

Treading cautiously, they probed into the age-old remains of the Santa Rosa for 43 minutes.

According to legend, the Santa Rosa sailed from Mexico in June, 1520, carrying the vast treasure in Aztec gold, upon which Montezuma, king of the Aztecs, had placed a terrible curse as a result of Cortes' betrayal of his friendship.

IN SHORT SUPPLY

Textiles Situation Not Expected To Improve Much For Year

FORT WILLIAM.—P. K. Heywood of Toronto, past president of the Canadian Retail Federation, said in an interview there is little chance of improvement in the textiles situation for a year.

Most retail goods are in short supply, and while some classifications will show improvement during 1946, it will be gradual.

Reconversion has been much slower than many people had hoped, as a result of a combination of reasons, including strikes.

PLANS NEW LEGION

TORONTO.—Regimental Sergeant-major the Chinese so far, Col. Richardson's service with the Canadian army, said he hopes to establish a Canadian Legion branch for Chinese-Canadian veterans, about 2,000 of whom served in the Canadian army.

HIGH COMMISSIONER NO STRANGER TO CANADA—Canada's new high commissioner, Sir Alexander Clutterbuck, who succeeds Rt. Hon. Malcolm MacDonald, is shown with Lady Clutterbuck at their home at Oatlands Park, near Weybridge, Surrey. Sir Alexander was assistant under-secretary in the Dominions office in charge of economics and supplies when he was posted to Canada.

Conference On Trade Barriers Being Planned

LONDON.—Forthcoming British commonwealth trade talks and the 14-power trade conference summoned by the United States are designed to get down to brass tacks on what the various countries concerned can concede and demand towards relaxing international trade barriers.

Herbert Morrison, government leader in the house of commons, announced Britain has been invited by United States to participate in the talks, probably this autumn. He said he understood Canada and a number of other countries have accepted invitations.

The British commonwealth talks probably will be crucial for the subsequent 14-country conference, just as the latter will be crucial to the worldwide conference which is expected to be called next spring by the United Nations.

The commonwealth talks are believed to have been under way since last December when the United States first issued invitations to the 14-power conference.

The crux of the commonwealth talks is to find out what concessions British exporters want from countries—particularly the United States—in return for any British concessions on empire preference, and how far the other commonwealth countries are prepared to allow Britain to reduce the empire preference they enjoy in the British market. The latter will depend on what concessions they in turn can obtain from other countries, again particularly the United States.

At this stage the talks on the British side are more important than on the American because the British imperial preference system is bigger and more complicated than the United States preference system (which is confined to Cuba and the Philippines).

THE NEWEST TOWN

Pulp and Paper Mill Being Built At Terrace, Ontario

FORT WILLIAM.—In a wilderness of forest and rock, construction crews, directed from temporary headquarters in Schreiber, are doing preliminary work on the \$15,000,000 Kimberly Clark pulp and paper mill project at Terrace, Ont., on the Agassabon river, 10 miles east of Schreiber.

Activity is increasing daily at Terrace. A few days ago, six large prefabricated camp buildings were erected, and new workers, arriving on every train, are swelling the small Kimberly Clark staff who during the winter compiled essential field data.

A year or so hence, trains will pull into the station of the new town of Terrace which Canadians will know as the site of one of the Dominion's largest pulp and paper mills. The lives of three thousand people may revolve about Canada's youngest industrial community.

MUST LEAVE CHINA

U.S. Military Authorities Will Deport All Followers Of Hitler

SHANGHAI.—A round-up of prominent Nazis hiding in China was announced by United States military authorities as plans were laid for mass deportation of all Germans known to have been connected with the Hitler regime.

"We are going to get them all even those who have been able to Major H. L. Hang, veteran of six and C. Wittmann, registration chief in the China theatre, said.

Col. Wittmann said the Nazis probably would be tried in war crimes courts in Germany, and added that negotiations were under way with Soviet, British and French authorities for the return of these repatriates to their respective sections of the fatherland.

CAMPAIGN STARTS

Royal Canadian Navy Is Out To Recruit 18,000 Men

OTTAWA.—The Royal Canadian Navy's 19 reserve divisions across Canada started recruiting the 18,000 men who will take part-time training and be ready for an emergency. They will also furnish recruits for active service.

The permanent force needs another 4,800 men to bring its total to the required strength of 10,000 men and one of the most glamorous and deepest holes to be filled is in the newly-formed fleet air arm.

Naval divisions have been authorized to recruit up to 65 per cent of their quotas from former officers and ratings of the reserve demobilized since the war. The remaining 35 per cent will be made up of rookies without previous naval experience.

REFUSES SALARY

New Director General Of UNRRA Will Not Accept Pay

NEW YORK.—Florence H. La Guardia, director general of the United Nations Relief and Rehabilitation Administration, said he was not accepting any of the \$15,000 a year salary he could draw in that position.

Herbert H. Lehman, recently retired UNRRA head, also served without compensation. Officials of the organization said he drew on his funds only for actual transportation expenses overseas.

PARCELS WOULD HELP

WINNIPEG.—J. D. Perrin of Winnipeg, home from a tour of Britain and France, said in an interview that gifts of food parcels by Canadians to friends in England will help to alleviate the food crisis in the United Kingdom.

KING DECORATES CANADIAN V.C. WINNER—V.C. winner Major John W. Foote, of Port Hope, Ont., shows his medal to Pte. Ann Lawton, C.W.A.C., of Montreal, after being decorated by the King. Lieut.-Col. W. Gilling looks on.

ILLUMINATED RESOLUTION—Soon to be presented to the Secretary General of UN by Prime Minister W. L. Mackenzie King is the illuminated resolution, shown in the above photograph, which assures the adherence of the Fisheries Council of Canada to the Charter of the United Nations. The resolution, which was signed by leaders of the fishing industry representing all parts of the Dominion, was accepted on behalf of the Prime Minister by Honourable H. Francis G. Bridges, Minister of Fisheries (right) from C. J. Morrow (left) of Lunenburg, N.S., retiring President of the Fisheries Council of Canada. The presentation was made at Ottawa during the Council's first annual meeting.

Gardiner Hints Further Jump In Farm Prices

OTTAWA.—Agriculture Minister J. G. Gardiner told the house today before the debate on the increase of 12½ per cent. in farm implement prices, that he was "satisfied that the adjustments which have been made are going to be followed by others."

"A good job will be done for the farmers so that in the next few years they will be able to pay off all their debts," declared Mr. Gardiner.

Mr. Gardiner said he had always been opposed to increases in farm implement prices but on this occasion too much emphasis had been laid on the figure of 12½ per cent. which actually meant an increase of three quarters of one per cent. on the farmers' cost of production on the basis that farm implements represent six per cent. of the farmers' cost of production.

Mr. Gardiner thought the finance minister had made a fair statement of the relations of between the farmers and the farm implement companies.

He denied, however, suggestions that he had heard around the corridors that the farmers are well off today, that they had reduced their indebtedness to some 30 mortgage companies from \$168,000,000 to \$66,000,000.

"That didn't mean the farmers had \$100,000,000 more cash," he stated. The farmer had worked long hours and long days to produce during the war at reasonable prices, and that he had thereby been able to pay into the treasuries of the mortgage companies \$100,000,000 of their loans. It meant the farmers still owed the mortgage companies \$66,000,000, and that being so, they could not be well off. Their second ambition was to clear off their farm implement debts.

If a farmer could clear off the mortgage on his farm and his farm implement debts, there was no better way to live than on farms. But not until he was clear of such debts.

Mr. Gardiner said that the recent rise of four cents a pound in butter prices was actually a 10 per cent. boost, which might be compared to the 12½ per cent. increase in farm implement prices. The farmer might be said to be on top now where he was at least getting by with the recent increase in the price of hogs of approximately six per cent.

"The price board," said Mr. Gardiner, "cannot make all its adjustments at once unless it applied the method of the Progressive Conservative opposition, and the whole business of price control up."

He was satisfied that the adjustments which have been made were going to be followed by others.

The minister's statement followed a lengthy one by Finance Minister J. L. Iles, strongly increasing the action of the price board in deferring farm implement prices.

The board had acted after long and careful study of the question and the minister had his approval.

MAY BE CHANGED

Request Made For Overhauling Of Income Tax Legislation

OTTAWA.—Evidence now being assembled by the senate income tax committee will form the basis for a report which will recommend overhauling of income tax legislation and the provision of a new appeal procedure. The committee started work last year.

Two of the most important briefs were those of the Canadian Bar Association and the Canadian Association of Chartered Accountants.

A common theme, through a majority of the briefs received is the need for a new appeal procedure which would provide simple, economical and speedy handling of disputes. Under the present legislation dissatisfied taxpayers may appeal to the minister. If they do not receive satisfaction from him they may go to the exchequer court and from there to the supreme court and privy council.

WILL BE DEBATED

Decision Must Be Made On Future Of Registration Cards

OTTAWA.—Future of national registration cards which Canadians have carried since 1940 likely will be decided when, later, parliament estimates come before the commons. The estimates for the current fiscal year provide \$234,625 for the expense of continuing the registration through recording new registrations of persons reaching the age of 16, changes of address and deaths.

The matter is expected to be the subject of some debate and there will be opposition to continuing it both on the grounds of expense and on the ground that it is a form of registration not warranted in peacetime.

LONDON.—Because of feed shortages, the International Horse Show at White City, London, in June will not accept competitors from abroad.

"Meet my neighbour... my rainy-day expert"

"Pretty swanky, eh?" said Henry's neighbour, eyeing the new sunroom. "How come? Did you win some money at the races?"

"Meet my neighbour... my rainy-day expert," said Henry. "As my life insurance man, he helped me finance this new sunroom fifteen years ago."

"Fifteen years ago!" exclaimed the builder, glancing from one to the other.

"Years ago he gave me a new slant on life insurance—Provide for the rainy days... then you can enjoy the sunshine. So that's the way I budget. My life insurance premiums are the first call on my income. That means I don't have to worry about Kity and the kids. Then I figure current expenses, right down to so much a week for movies and ice cream cones. And *then*... whatever I can bank over and above that is velvet. When it mounts up, Kity gets a new gadget for the kitchen, or we smarten up the house. This new sunroom comes out of our velvet."

There is nothing like life insurance to give a man peace of mind. He can enjoy spending if he is sure that the future of his loved ones is secure. Everyone wants independence and protection for his family... and when that is insured, a man can indulge his whims.

Near you, wherever you are, is a neighbour in the life insurance business. Ask him for advice in planning your future. It is good citizenship to own life insurance.

The Crows' Nest Victory Party will arrive first on Friday April 27th. Who are they? The Instrumentalists of Calgary under the leadership of Maj. Norman Buckley, of the Public Relations department. This group is out in the interests of the Kingdom of God and will also give all a good time. They leave Calgary on Thursday for Lethbridge. On Friday night Fernie will have this group for a big Salvation meeting. They shall return to Coleman on Saturday. Special open airs will be conducted in Bellevue, at 4:15 p.m., Blaimore 5 p.m., and in Coleman at 7:30. Saturday evening will mark a Great Youth Rally in the Salvation Army hall. The public are invited to this. Sunday meetings will be conducted at 11 a.m., and 7:30 p.m. At 3 p.m. a special musical programme will be held in the United Church, with the United Junior choir taking an active part. You come and bring a friend. This will also mark the 31st anniversary of the Salvation Army in the Pass.

BRITAIN'S WOMEN TO SHOP IN SAFETY

The report has just been published of a departmental committee of the Ministry of War Transport on design and layout of roads in built-up areas. Among the radical reforms recommended is that the main shopping centres of towns should be progressively converted into or transferred to "traffic quiet" areas. There would be waiting lands or car parks for private cars, but buses and through traffic would be diverted from central areas by encircling them with an inner ring road of about six hundred yards diameter. Thus shoppers would not have to walk more than three hundred yards from a bus. Other proposals are for the extensive development of pedestrian ways lined by shops, and of cycle ways. Where motorways are needed through built-up areas the report suggests they should be subsurface or elevated.

EASIER FOREIGN TRAVEL

The Travel Association of Britain has taken the first step towards making foreign travel easier and more comfortable. The association proposes that passports should be abolished or simplified. One of the first suggested simplifications is the abolition of visas or at least the provision of entry visas without charge. The British government is supporting the Travel Association's efforts. A conference is to be held in London in May to which the representatives of many foreign travel agencies have been invited. The British proposals will be put forward at this conference, and representative British circles have expressed the hope that these negotiations will lead to some practical simplifications in foreign travel. Another important point on the agenda of this conference is a British proposal to make Customs frontier formalities as easy and pleasant as possible.

There are Boy Scouts in 47 countries of the world in addition to all parts of the British Commonwealth.

NEW BRITISH PLASTIC WILL SPEED HOUSEBUILDING

A new British plastic building material which will considerably speed the United Kingdom housing drive is shortly to go into mass production. This material will be used in the erection of prefabricated houses. The most important feature is the economy of its composition: it is made from a variety of raw materials generally regarded as waste, e.g. sawdust and straw. The method of production involves chemical treatment and bonding with synthetic adhesives of a type successfully used in aircraft production. The resultant product is a high grade, low-priced material, useful as inner walls, partitions, etc. It is capable of being produced in boards of varying size and thickness, in a wide range of colors, textures and finishes. It can be sawn, drilled, nailed, screwed and generally fabricated like timber, but is virtually rot and vermin proof. Another valuable feature of this new material is that it combines easily with other materials such as timber, glass or tubular steel. It will be useful, therefore, for a wide range of commercial purposes, e.g. for restaurant and department store fittings and furnishings.

IRISH LINEN DISH TOWELS DOUBLE AS BREAKFAST CLOTHS

Dictionary Webster, in his long-winded way, defines imagination as "the power faculty which enables a person to produce a new, impressive and artistic whole by selecting and working up ideas derived through observation and memory." Probably it's a good definition. But it doesn't take a complex mental attitude like that to provide the family with able settings that whet the appetite and make even the simplest meal enjoyable.

One of the best examples of imagination we've seen came about when one of our acquaintances was unable to replenish her pre-war stock of gay Irish linen breakfast cloths. She insisted on Irish linen both because to her, as to so many women, this fabric represents quality and because she finds it launders so beautifully and wears so long.

Undeterred by shortages she succeeded in keeping her breakfast tables interesting by making her cloths from Irish linen dish towels. For each cloth she took four towels, joining them, lengthwise and crosswise, with rick-rack braid. And she points out that instead of rick-rack she could have used feather-stitching, or a heavy cord or crochet thread lacing, or bands of plain linen.

On striped and plaid towels, rick-rack in white or one of the colors of the towel was used. On towels with just a band of color on the sides, she used a contrasting color braid.

TRY OUR SOCIETY PRINTING

WORLD FOOD EMERGENCY

Starvation threatens in the Far East and hunger in Europe. We are sending food. We must send more. The need is now—until harvest!

We must help feed a hungry world

A serious shortage of food in certain areas of the world was expected, but crop failures in many areas, and lack of distribution facilities, seeds, and tools in others created a food shortage of alarming proportions. Only immediate deliveries of staple foods can sustain the hungry millions.

PRODUCE AND SAVE — MORE

Since 1939, our per capita record of food exports has exceeded that of any other country. Food production has soared. Canadians have eaten well in spite of war. Today, the seriousness of the world's food situation calls for even greater efforts. We can increase our food shipments and still have enough for our needs.

THIS IS WHAT WE CAN DO

We can ship more WHEAT, FLOUR, MEATS, CHEESE and EGGS if as great quantities as possible are made available for shipment during the next four months.

PRODUCERS! — DELIVER TO MARKET.

CONSUMERS! — BUY LESS OF THESE FOODS — BUY ONLY FOR IMMEDIATE NEEDS—WASTE NOTHING—PLANT A GARDEN—SUBSTITUTE VEGETABLES FOR AS MANY OF THESE VITAL FOODS AS YOU CAN.

This will increase supplies at storage depots, thus freeing additional needed foods for the world's hungry. There can be no permanent prosperity for us... or anyone... while hunger and despair afflict large areas of the world.

Share with the hungry!
